

# LED Light Channels

STOCK SIZES: 12", 24", 36", 48", 60", 72" lengths  
 Custom sizes also available in 1/2" increments

**Weatherproof Design:** IP67 rating, resistant to dust and water, suitable for both indoor and outdoor applications.

**Ultra-Bright Illumination:** 3 powerful LED diodes every 1/2"

**Versatile Color Temperature:** 4000K color temperature offers a neutral white shade that is perfect for cool and warm settings.

**Sleek and Stylish:** LED tape is elegantly housed in a sleek black aluminum channel.

**Hassle-Free Installation:** Color-coded wires between LED tape and dimmer/driver switch simplify the installation process.

**Even Light Distribution:** The diffuser lens ensures that the light is evenly dispersed, without any harsh glares or hotspots.

**Reliable and Long-Lasting:** Secure soldered connections that will provide 100,000 hrs of illumination.

**Neat and Organized:** Silicone caps and end caps protect and finish the LED lighting.

- Custom designed LED tape with pre-wired LED lengths in a sleek black aluminum channel with diffuser lens.
- Versatile solution for adding lighting to existing niches, benches, under cabinets, & more
- Superior quality & durability with a sleek black aluminum channel for added protection.
- Effortless installation with customizable pre-wired LED lengths available in 1/2" increments.
- Enhance any space with uniform light distribution and a smooth, glare free illumination effect
- 4000K temperature for compatibility with warm and cool surfaces.

Dimmer-driver switch is UL listed.  
 LED required 12Vdc connection.  
 Easy 1-step connection - niche to dimmer switch/driver.  
 Steam rated components  
 4000K natural white serviceable light.

**Disclaimer:** It is important to note that LED lights must always be used with a proper power supply. Using an incorrect or incompatible power supply can result in malfunctioning lights, reduce lifespan, or safety hazards. When selecting a power supply for your LED lighting needs, make sure it is specifically designed for use with LED lights and meets the necessary voltage and current requirements.
